Capstone Project

Searching 24/7 medical stores using Foursquare

Problem Definition

- A tourist/newcomer visits a city and is unaware of various necessity deliverable outlets nearby

- He has an urgent requirement of a medicine at midnight and needs to search a medical store nearby

- Using Foursquare application will help him search nearby medical shops and filter out one which exactly meets his requirement

Foursquare a solution indeed

- The tourist/visitor logs in to the Foursquare application
- Searches for nearby medical stores operating 24/7
- Checks the reviews of these stores and the quality of medicines they deliver
- Goes through the tips given by other visitors to these shops and finally selects a particular medical store

Locating Medical Store
